#### A Profitable "Pilgrim."

The power of curiosity has been well itustrated during the last few days by the orice paid by loiterers in the lobby at Willand's to find out the why and wherefore of a very ingenious contrivance that occupies prominent place in the lunch-room. It a prominent place in the lunch-room. It represents in miniature the new steamer Pilgrim of the famous Old Colony Line, and, at first glance, one looks upon it simply as a dumb advertisement of a model-maker or perhaps of the boat company. The little vessel measures four feet over all, is made of brass, with here and there a gold and silver setting. The whole is proportionate and accurate in every detail. It stands in a raised cabinet inclosed in glass, and is represented as resting on a choppy, white-capped sea. Close inspection, however, shows the model to be a thing of life. A little aperture on one side invites the insertion of a five-cent nickel piece. No larger piece will go in and no smaller one is heavy chough to set the machinery in motion. The nickel, however, does the wijk. Agitution is given to the sea sur-

addle wheels, and revolution to the cylin der of a music box. It does not appear whether the model is destined for a money-getting machine entirely or as a self-sup-porting display of an artificer's cumning, but the power of its attraction to the curious public, even at this duil season of the year, is amply illustrated by the fact that its cush drawer when emptied on Saturday night disclosed something over \$44 as the income of about five days. ncome of about five days.
